

Hygienic Plan 8th/9th grade Ski Trip 2022

Participation is only possible with a completed Covid-19-vaccination, a verification of a Covid-19 infection or a negative PCR-test within the last 48 hours prior to departure (Oct. 2021). Please avoid social contacts during the last 2-3 days. You must use FFP2 masks.

1. Prior to the trip parents will ensure that students with symptoms do not go on the trip. However, after the symptoms are gone, it will be possible to join the trip.
2. Written verifications of a vaccination or former infection must be turned in to the sport teacher or secretary at least 2 weeks before the trip (9th grade before March 1st). Every student will be tested again before entering the bus (rapid test).
3. On the day of departure, the students` hands will be disinfected, as well as, the temperature measured. Students with temperature may not go on the trip that day.
4. Wearing a mask on the bus ramp is mandatory for students, parents and teachers.
5. Masks are mandatory during the bus ride. At rest areas, students must wear their mask, except when eating and drinking. Purchasing items at the rest areas will not be allowed. Students are supposed to bring enough to eat and drink for an 8-10 hour bus ride.
6. During the entire trip, students are asked to keep a distance of 1,50m from strangers. When that is not possible, students must wear masks.
7. Students leaving our hotel in Bruck are required to wear masks. Activities like shopping may be limited.
8. Inside the hotel we will follow hygienic regulations of the local authorities/the house. We will request hand hygienic before and after the meals, before and after skiing and before and after leaving the house. While inside the hotel, students do not have to wear masks unless in contact with strangers. Note: Our hotel is rather isolated, contact with strangers is very unlikely.
9. Every student will be tested 2-3x per week (rapid test).
10. While driving to and from the ski area, as well as, using the gondola, students are required to wear a mask.
11. As much as possible the use of gondolas will be limited. We will try to ensure that the use of gondolas will only happen within our group. This procedure will also be instilled on all other lifts when possible.
12. In the lift lines we will keep 1,50m distance to others when possible. Students will have to wear a mask.
13. During lunch breaks students will keep a distance of 1,50m to strangers and will wear a mask. Students will sit at tables only within the group. Mask may not be taken off until sitting down at the table. Students must wear a mask when going to the bathroom or to wash hands.
14. We will not go swimming on the two ski free days this year. Instead we will run alternative fun activities within the group (e.g. soccer tournament etc.).
15. In case students get sick during the trip, the teacher in charge, together with other teachers and if needed in communication with the local authorities, will decide about every individual case. Students with minor symptoms will stay in the house under supervision of a teacher. An additional test might be done by the teachers. Students with prolonged fever (more than two days above 38,5° C), breathing issues and loss of smelling and/or tasting will see a doctor who then will decide about the procedure.
16. If the doctor does not feel it necessary to test, students may participate in all group events again after 24 hours without symptoms.

17. If the doctor decides to test a student, the student will stay isolated (as much as possible) till the test results are in (problem).
18. When students are sick, contact to other students will be limited. Distancing and mask regulations will then apply also within the house and the rooms. When possible (depends on the numbers of students), students will be isolated in a separate room.
19. It might be necessary that, in individual cases, sick students will have to be picked up by parents.
20. The administration ensures that an additional teacher will accompany the trip who will primarily take care of sick students.
21. Repeated violation of the hygienic rules may lead to expulsion.
22. Regulations also apply to chaperones.

These hygienic regulations reflect the current development of the Covid-19 situation. Without question, they might have to be adjusted in the next weeks and months depending on the development. It might also be necessary to cancel or shorten the trip if the situation worsens before or during the trip. Unfortunately, that may lead to cancellation costs, which will not be refunded by the Berlin Senat. We have a cancellation agreement with the bus company and the house (see First Information sheet). In the ski area, costs only apply when a service was used.

Please contact your insurance company about travel insurance which might cover cancellation costs. Again, there will not be any refund by the Berlin Senat.

Please verify your acknowledgement and agreement with the measurements above by signing below.
